

Automated VFX and marketing pulls. Powered by Galaxy.

Among its ever-expanding feature set, Light Iron’s Galaxy platform incorporates powerful automations to significantly streamline requests and deliveries of VFX and marketing pulls. With support for cloud-based, traditional, and hybrid workflows, Galaxy places total control at your fingertips.

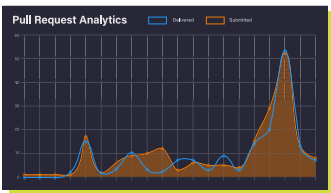

Take command of your pull requests.

AVAILABLE ON DESKTOP AND MOBILE DEVICES, GALIXY ENABLES YOU TO:

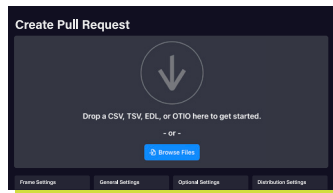

- Request, instantly validate, & track the progress of pulls
- Make on-the-spot adjustments to address request issues
- Add new recipients to existing pull requests
- Easily manage & navigate between multiple projects
- Receive requested pulls in minutes or hours instead of days
- Click to contact your Light Iron rep directly

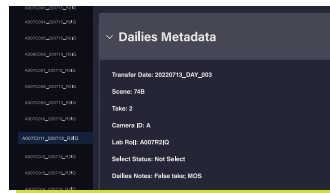

Intuitive user interface with easy filtering, useful analytics, & time-saving search

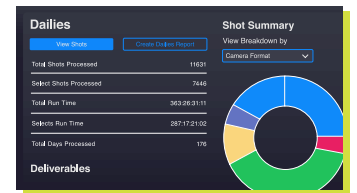

Support for a **wide variety of list formats**, including TSV files directly from Avid bins

On-demand access to OCF & dailies metadata **from anywhere in the world**

Additional integrations with Light Iron dailies, color, VFX, & finishing services

Make time to be creative.

The increased efficiencies of Galaxy enable your time to be spent on what matters most: **creativity**.

Package pricing available for bundling with other Light Iron or Panavision services.
